

Mariam Hesham Ramadan

Front-End Developer

mariam.hesham.ramadan@gmail.com [Git-Hub](#) [LinkedIn](#) +201066135369 /+201151378892 [Portfolio](#)

SUMMARY

Junior Frontend Developer with around 1 year of experience building **responsive, user-focused web applications** using **Angular, React.js**. Skilled in **REST API integration, UI/UX best practices**, and **performance optimization**. Proficient in **Agile/SCRUM** environments with strong **problem-solving** and **team collaboration** skills. Passionate about delivering **high-quality, scalable solutions** and continuously improving technical expertise.

EDUCATION

Bachelor's degree in Computer Science, Future Academy Cumulative GPA: 3.6/4.0 (B+) Nov 2019 – Jun 2023

EXPERIENCE

Junior Software Engineering at Soft-Trend Oct 2024 – Dec 2024
Resolved marketplace bugs, enhancing system stability and user experience. Applied SCRUM practices to deliver timely and efficient solutions.

PROJECTS

Shop.co React.js Ecommerce [🔗](#)

Developing a responsive e-commerce frontend using **React, Tailwind CSS, Redux**, and **React Router**. Includes product browsing, filtering, cart management, checkout, reviews, and authentication. Integrated with a real backend API via **Axios**, with form handling using **Formik** and **Yup**

Admin-Dashboard-Task-management

Developed an admin dashboard frontend using **Angular v.20** with **Standalone Components**. The system allows administrators to manage employees, assign tasks, monitor progress, and control user access. Built with **Angular Signals, Lazy Loading, protected routes**, and **dynamic reactive forms** to ensure optimal performance and maintainability.

All-In-one E-Commerce [🔗](#)

A modern, **responsive** online store built with **Angular 17** using **Standalone** Components and clean architecture. It features product browsing with **search** and filters, cart and **wishlist** management, full **authentication**, protected routes, a **mock-based checkout** process, and optimized performance via **Lazy Loading** and **Angular Signals**.

Graduation Project (Citizen-Hub) *Frontend: Angular | Backend: .NET Core | AI: Python*

Worked as a team on an **AI-powered** web application that simplifies communication between citizens and the government by allowing registration, submitting complaints, and analyzing them for appropriate action. Grade: 4/4 A+

COURSES

React JS at Route Academy

Digital Egypt Pioneers Initiative (DEPI) .NET Full-Stack Course. [🔗](#)

Mastering Angular +17+ E-commerce App, **Udemy** [🔗](#)

SKILLS

- Frontend: Angular, React.js, TS, JS, HTML5, SCSS, Bootstrap, Tailwind css, API Integration, Angular Signals, NPM, CLI.
- Tools: Version Control 'Git, GitHub', Visual Studio, SQL Management Studio, Postman, Swagger.
- Concepts: OOP, N-Tier Architecture, Lazy Loading, Responsive Design, RESTful API Integration.
- Familiar with: Micro-Frontend, Webpack, Agile Methodology 'SCRUM', UI/UX principles.
- Soft Skills: Problem Solving, Team Collaboration, Communication Skills, Time Management.
